

VENKATESH K R

Software Test Engineer | Manual & Automation Testing

9900109923 | Venkatesha9164@gmail.com

OBJECTIVE

Computer Science graduate seeking a Software Testing role, with a solid foundation in both Manual Testing (SDLC, STLC, defect life cycle, test case design) and Automation Testing (Selenium WebDriver, Java, TestNG). A quick learner with strong analytical and problem-solving skills, committed to ensuring application quality through thorough testing and efficient automation. Eager to contribute to a QA team and grow as a Software Test Engineer.

CORE SKILLS

- **Manual Testing:** SDLC, STLC, Defect Life Cycle, Test Case Design & Execution, Test Plan Preparation
- **Automation Testing:** Selenium WebDriver, TestNG, Maven, Jenkins, XPath, CSS Selectors
- **Frameworks:** Page Object Model (POM), Hybrid, Modular, Data-Driven, Keyword-Driven
- **Programming:** Java - OOP (Encapsulation, Inheritance, Polymorphism, Abstraction)
- **Methodology:** Agile/Scrum, Defect Reporting & Tracking
- **Database:** SQL - DDL, DML, Joins, Operators, Aggregate & Single-row Functions, Nested & Correlated Subqueries
- **Tools/IDE:** IntelliJ IDEA, Eclipse, Visual Studio Code

PROJECTS

Vehicle Service Management System

Python, HTML, CSS, JavaScript

- Built and tested a vehicle service booking system, designing test cases for valid, invalid, and boundary inputs across booking and reporting modules.
- Mapped repeatable user flows (booking, history lookup) as strong candidates for Selenium automation, reducing manual re-testing effort.

Airline Management System

Java, SQL, HTML, CSS, JavaScript

- Tested flight scheduling, ticket booking, and passenger record modules for functional correctness, validating edge cases and data integrity via SQL.
- Applied core Java (OOP) concepts to understand application logic, building a foundation for automation scripting.

Convert Real Image to Cartoon Face

Python, OpenCV, HTML, CSS, JavaScript

- Verified image processing outputs against expected results using a structured, checklist-driven testing approach across varied inputs.

KEY STRENGTHS

- Strong attention to detail with a methodical, analytical approach to identifying defects and automating repetitive checks.
- Quick learner, adaptable to new tools, domains, and testing/automation frameworks.
- Good communication skills for clear defect reporting, test documentation, and team collaboration in Agile/Scrum environments.

EDUCATION

B.E. Computer Science - STJ Institute of Technology, Ranebennur (Dec 2022 - Jun 2026)

PUC - Prism PU Science College, Dharwad - 82.33%

SSLC - Raja Rajeshwari Public School, Malebennur - 78.08%

EXTRA-CURRICULAR ACTIVITIES

Playing Cricket | Listening to Music | Travelling
